

Data Capture and Digitalization

We provide Data Digitization services by which physical or manual records such as text, images, video, and audio are converted into digital formats. We can virtually digitize anything that is on paper or in an analog format. Some examples are given below:

- Microfilm / Microfiche and Aperture Card conversion
- Scanning and Indexing of documents (from paper to electronic formats)
- CD Publishing and Image Processing (Scanning, Labeling, Cropping and Masking)
- Creation of smart manuals, books, journals, hyper linking related material for easy cross-referencing
- Text Conversion - OCR (Optical Character Recognition) and ICR (Intelligent Character Recognition) and manual re-keying.
- Database entry, form filling, tagging and referencing services

Data Conversion

Data conversion allows data to be stored in electronic formats for easy accessibility in consistent formats. We can convert data from most existing formats including:

- PDF **to** HTML, RTF, MS Word, XML, SGML
- Quark Xpress, Indesign, Adobe PageMaker, MS Word, HTML, SML or SGML , Hard copy (handwritten or printouts) **to** PDF
- We also support data conversion in formats such as Frame Maker, Word Perfect, Interleaf, Book Master, Xyvision, Folio, Miles33, TeX/LaTeX, Penta, Troff, Ventura, e-book and image formats

e-Publishing / e-Books for Digital Ink Readers

An e-book (short for electronic book) is an e-text that forms the digital media equivalent of a conventional printed book, journal or any type of physical literature. We support onward conversion to all the major e-book formats, including ePub, Mobipocket, Acrobat Reader, Adobe Digital Editions, etc. We have capabilities in handling pagination software such as InDesign/Quark Express, TeX and LaTeX and manage foreign languages with predominant English alphabets. Any other languages are managed as image processing projects. We are at the forefront of technological advancements in the electronic media. We offer turn-key solutions in e-publishing which include:

- Production of eBooks / ePub format compatible with all Digital Ink Readers including Sony, Kindle, BeBook, iRex, Bookeen Cybook, Hanlin, Hanvon, Foxit reader etc
- e-Books can also be created in other formats including pdf, doc, rtf, txt, mobi, prc, lit, html etc.
- Creation of secure, searchable online databases
- We have expertise in converting conventional printed books to Large Print Books for visually impaired. We also convert conventional printed books to XML code, which in turn is converted to Braille and Audio Books for the blind and the visually impaired.

Pre-press Services

We can provide a wide range of pre-press services including, typesetting, pagination, page layout in Quark Express, InDesign and other popular software. We also provide Content Enhancement services including artwork generation, art work retouching and cover design.

Print on Demand Conversion Services

Print on demand (POD) the digital printing technology and business process in which new copies of a book (or other document) are not printed until an order has been received is now being adopted by most publishing houses. We provide services for conversion of books and other reading material in any software format or hard copy to print ready high resolution PDF format in regular and large fonts. Currently, we convert English language publications with the ability to convert titles in other languages as per demand.

Web Portal Designing, Testing and Optimization

We offer quality web portal designing, testing and optimization services, deploying a team of highly professional and experienced web designers to provide customized services.

Digital Library Solutions

We can create seamless repositories of your digital data that can be accessed whenever required, even remotely. Digital library management service includes:

Building digital collections, Image/ graphical enrichment of content, Storage & retrieval of text / audio / video formats, Data reformatting services, Multi-language capability

Book Fact Verification

We offer Book Fact Verification services helpful for all publishing houses to conduct a check before publishing any book to ensure that the content featured in the book is true and will not affect their credibility if they publish any incorrect information written by the author.

Also, this service helps the publisher to avoid any legal actions in case of publication of any copy righted material as we will verify all the data before publishing.
